

SPRINT 1: System Setup & Authentication

Goal: Establish system foundation, authentication, and dashboard access for Users and Admins using Supabase.

Epic 1: Manage Users (Authentication and Access Control)

1. As a **user**, I want to create an account so that I can securely access the system.
 2. As a **user**, I want to verify my email during registration so that my account is validated before use.
 3. As a **user**, I want to log in to the system so that I can access my personal dashboard.
 4. As a **user**, I want to log out of my account so that my session is securely ended.
 5. As a **user**, I want to reset my password so that I can recover my account if I forget it.
 6. As an **admin**, I want to log in with my administrative credentials so that I can manage the system.
 7. As an **admin**, I want to log out of my admin account so that unauthorized access is prevented.
-

Epic 2: Access My Dashboard (User/Admin Homepage)

8. As a **user**, I want to access my dashboard after logging in so that I can view my profile and sales overview.
9. As a **user**, I want to see a summary of my total sales and orders on my dashboard so that I can monitor my activity.
10. As an **admin**, I want to access my admin dashboard so that I can view overall user activities and system statistics.

SALES MANAGEMENT SYSTEM — COMPLETE USER & ADMIN STORIES PER SPRINT

11. As an **admin**, I want to see total users, total sales, and pending approvals on my dashboard so that I can easily manage system operations.

Sprint 1 Outcome:

- User registration, login, logout, password reset, and dashboards functional.
- Supabase Auth and profiles table connected.

SPRINT 2: Sales & Order Management

Goal: Enable Users to record and manage sales and orders while allowing Admins to oversee, approve, and control these entries.

Epic 3: Manage Sales Records

1. As a **user**, I want to add a new sales record so that I can keep track of my daily transactions.
2. As a **user**, I want to edit a sales record so that I can correct mistakes in the data I entered.
3. As a **user**, I want to delete a sales record so that I can remove outdated or incorrect transactions.
4. As a **user**, I want to view a list of all my sales records so that I can monitor my sales history.
5. As an **admin**, I want to view all sales records from all users so that I can analyze overall sales performance.
6. As an **admin**, I want to approve or reject user sales entries so that I can ensure data accuracy and validity.

SALES MANAGEMENT SYSTEM — COMPLETE USER & ADMIN STORIES PER SPRINT

7. As an **admin**, I want to update or delete invalid sales records so that the system database remains clean.
-

Epic 4: Manage Orders

8. As a **user**, I want to create a new order so that I can record product requests or purchases.
 9. As a **user**, I want to update an existing order so that I can modify details before confirmation.
 10. As a **user**, I want to cancel an order so that I can withdraw requests I no longer need.
 11. As a **user**, I want to view a list of my orders so that I can track their status.
 12. As an **admin**, I want to view all user orders so that I can manage inventory and approvals.
 13. As an **admin**, I want to update the status of an order (pending, approved, cancelled) so that I can monitor order fulfillment.
-

Sprint 2 Outcome:

- CRUD functions for Sales and Orders complete.
 - Admin can approve, reject, or view records.
-

SPRINT 3: Reports & Analytics

Goal: Generate and analyze sales data for Users and Admins through reports, charts, and exports.

Epic 5: View Reports

1. As a **user**, I want to view my personal sales reports so that I can evaluate my performance.
 2. As a **user**, I want to filter my sales reports by date range so that I can check performance for specific periods.
 3. As an **admin**, I want to view overall sales reports across all users so that I can analyze business performance.
 4. As an **admin**, I want to export sales reports as PDF or CSV so that I can store or share records offline.
-

Epic 6: Analyze Sales Trends

5. As a **user**, I want to view my sales progress in graphical form so that I can easily understand my trends.
 6. As an **admin**, I want to view charts and visual reports so that I can identify high-performing users and products.
 7. As an **admin**, I want to compare monthly or yearly sales trends so that I can make data-driven decisions.
 8. As an **admin**, I want to view performance leaderboards of users so that I can reward top performers.
-

Sprint 3 Outcome:

- Report viewing and filtering complete.
 - Charts and analytics implemented for both users and admins.
-

SPRINT 4: User Management & Data Backup

Goal: Give Admins complete control over users, roles, and system backups to ensure security and data recovery.

Epic 7: Manage Users (Admin Control)

1. As an **admin**, I want to view all registered users so that I can see who has access to the system.
 2. As an **admin**, I want to search for specific users so that I can find and manage them quickly.
 3. As an **admin**, I want to update user details so that I can correct inaccurate information.
 4. As an **admin**, I want to delete user accounts so that I can remove inactive or unauthorized users.
 5. As an **admin**, I want to assign roles to users so that I can define their access privileges.
 6. As an **admin**, I want to suspend or reactivate user accounts so that I can control user access.
-

Epic 8: Backup and Restore Data

7. As an **admin**, I want to back up all system data so that I can safeguard it against loss or corruption.
 8. As an **admin**, I want to schedule automatic backups so that data is regularly secured without manual work.
 9. As an **admin**, I want to restore data from a previous backup so that I can recover the system after errors or crashes.
-

 **Sprint 4 Outcome:**

SALES MANAGEMENT SYSTEM — COMPLETE USER & ADMIN STORIES PER SPRINT

- Admin can fully manage users and roles.
 - System has functional backup and restore capability.
-

SPRINT 5: Integration, Testing & Deployment

Goal: Integrate all system components, conduct testing, and deploy the final Sales Management System.

Epic 9: Final Integration & Deployment

1. As a **user**, I want to test all system features so that I can confirm they function as expected.
 2. As an **admin**, I want to conduct system-wide testing so that I can ensure there are no bugs before deployment.
 3. As an **admin**, I want to review all system modules so that I can confirm that all features meet project requirements.
 4. As an **admin**, I want to deploy the system online so that users can access it from anywhere.
 5. As an **admin**, I want to monitor system performance after deployment so that I can maintain reliability.
 6. As a **team**, we want to present and demonstrate the final system so that stakeholders can validate our project deliverables.
-

Sprint 5 Outcome:

- Fully tested and integrated system.
- Deployment completed and validated.

- Presentation ready for evaluation.

SUMMARY TABLE — COMPLETE SYSTEM COVERAGE

Sprint	Focus	Epics Covered	No. of User Stories
Sprint 1	System Setup & Authentication	Manage Users, Access Dashboard	11
Sprint 2	Sales & Order Management	Manage Sales, Manage Orders	13
Sprint 3	Reports & Analytics	View Reports, Analyze Trends	8
Sprint 4	User Management & Backup	Manage Users (Admin), Backup & Restore	9
Sprint 5	Integration & Deployment	Final Integration & Deployment	6

TOTAL USER STORIES: 47

 Covers every function in your **use case diagram**, from authentication → sales → reports → management → deployment.
